

EuroCaravaning at the Caravan Salon 2024

Model year 2025: VANTourer is more

The VANTourer models from EuroCaravaning are a must at the Caravan Salon in Düsseldorf, the world's leading trade fair for mobile leisure. This year, visitors can expect even more innovations and additions to the VANTourer series.

Koblenz. EuroCaravaning continues to set new standards with the popular VANTourer van models. Here, elegant design meets innovative space concepts - even in compact dimensions. From the Urban to the 630 L, the VANTourer not only offers the tried and tested variants, but also presents adapted furnishing solutions and new model additions just in time for the Caravan Salon.

Compact model innovation

Last year, the VANTourer based on the Ford Transit was presented for the first time: As usual, the 600 D model shines with clever storage space concepts and smart space solutions. Now the Ford range is being extended by yet another model - as it is now available in the 550 D size as well. "Despite its compact size, the new VANTourer Ford 550 D scores points with its modern design and well-thought-out details," promises Steffen Gross, Managing Director of EuroCaravaning. In order to make optimum use of the space, the kitchen and furnishing elements have been adapted to the new vehicle length.

Classic and comfortable

The classic Fiat-based VANTourer models in the 540 D, 600 D, 600 L and 630 L sizes have been impressing customers for years with their clever space management and well-thought-out interiors. Now the all-rounders are getting a little makeover and will be presented at the Caravan Salon based on the new Fiat Ducato. Here, customers can enjoy a modern design, the usual generous amount of space and practical vehicle packages that have been adapted to the Stellantis equipment. Slanted wall units, a space-saving Truma diesel central heating system and numerous hidden storage spaces ensure optimized use of space and transform every model into a feel-good place. Also new on board is the clever Cleanflex toilet: innovative, hygienic and sustainable, it offers maximum comfort on the road.

VANTourer is more: optional extras

For even more flexibility, customers can customize their VANTourer with optional add-ons. Those who want to enjoy an even better view on the road can opt for the panoramic window option, for example, which turns every journey into a special experience. In addition, practical extensions such as the fold-down bed function and the pop-up roof not only offer additional sleeping options, but also provide more space in the rear and interior.

All functions at a glance

Want something even more cozy? Here you go: With the Revotion system, a smart control and infotainment system, the music, lights and climate in the vehicle can be conveniently controlled - either directly on the clear touch display or simply via the app. Important vehicle information such as fuel level, battery power and navigation are also available at all times, helping to make traveling stress-free and enjoyable. The Revotion control system is available for all VANTourer models and can be installed directly on request. Because VANTourer is more than just a vehicle: VANTourer is a home on four wheels.

Don't miss out: All new VANTourer models, which are available from €59,960, can be discovered on site in Düsseldorf at the EuroCaravanning exhibition stand in **Hall 01, Stand 1A01-06**.
